

THE EDGE

A natural colour with a similar structure as cell (fruity/sweet flavour) but with our own twist. We seem to have better success with this product spring/autumn, along with our base mix included is;

- Our own fruity/sweet attractors
- Molasses
- Crushed Hemp
- And...

ULTRA GRUBBIES

Again a natural colour taken on from its ingredients, we add just enough into this product to bring out an almost earthy aroma. Its attraction for fish is second to none, we dehydrate many of our own ingredients and this product benefits from this. Along with our base mix included is;

- Ground dried maggot
- Ground dry DENDRABEANA WORMS
- And an insect meal that we buy in (but we are working on our own, and as soon as complete it will be swapped out)
- Dried kelp
- And....

ULTRA TUNA

A dark natural/brown colour packed with fishy-ness and an almost smokey aroma, an excellent warmer water bait so well suited spring to autumn. Along with our base mix included is;

- Acti-fish pre digested fishmeal (100% soluble)
- Tuna hydrolysate
- Spirulina
- And our own ULTRA TUNA flavour
- And...

ULTRA SPICY SAUSAGE

Very good all rounder catches fish in the river as well as it does in still water, a definite pink/red colour. Along with our own base mix included is;

- Meaty fishmeal
- Robin red

- Mollases Meal
- Himalayan pink salt
- And our own ULTRA SPICY SAUSAGE flavour
- And...
